

### » Climate protection – Energy efficiency shows a way out of the economic crisis

In times of a global economic crisis climate protection is often seen of secondary importance, even though considerable revenues can be generated with environmentally-friendly techniques. This ranges from investments in renewable energies usage to the implementation of efficiency measures, which decrease the demand for fossil resources.

### » Overcoming the global economic crisis with commitment on a local basis

The Passive House standard can make a considerable contribution to overcoming the crisis. Above all, using this highly efficient standard will strengthen the regional economy. Local investments and generated turnovers will cause a boom independently from the global economic situation but with a sustainable effect on the worldwide climate.

### » The Passive House – a driving force for the regional economy

The county of Saxony has recognized the role the Passive House can play in strengthening the regional economy and supports the construction of these highly efficient buildings with the so-called 'Innovations- und Praxisverbund Passivhaus' (innovation and implementation network Passive House) for exemplary projects. Moreover, the bank 'Sächsische Aufbaubank - Förderbank -' offers a subsidy programme. In the Free State of Saxony it is therefore now possible for every future home-owner to fulfil his/her dream of a Passive House at nearly no additional costs. As a side effect, the regional building trade is strengthened, as the required competence for successful implementation can be found here.

### » Activities in Central- and Eastern Europe

Activities in Central and in Eastern Europe form another central topic for the upcoming Passive House Conference. The main focus will be on reports from those who have gained experience with the implementation of projects, with team work and with communication in recently established networks, as well as on the regional potential for the trades.

Further information and registration:

[www.passivehouseconference.org](http://www.passivehouseconference.org)

Over 1000 participants from Europe, North- and South America and Asia are expected to attend the 14<sup>th</sup> International Passive House Conference in Dresden. They will be introduced to the latest developments in energy-efficient architecture. The organizers invite anyone who is involved in energy-efficient construction to submit a paper to the conference. Instructions on the preparation of abstracts are posted on [www.passivhaustagung.de](http://www.passivhaustagung.de).

**The submission deadline is 2<sup>nd</sup> November 2009.**

### » The conference 2010 will focus the following topics

- 01 Regional economic additional value 'Passive House'
- 02 Energy Efficiency inside buildings – Electrical appliances suitable for Passive Houses
- 03 Passive House activities in Central and Eastern Europe
- 04 News from R&D: Building services and building envelope
- 05 Developments: Passive House-non-residential buildings
- 06 Solutions for the refurbishment of buildings worth preserving
- 07 Energy efficient construction in public space
- 08 Funding/financial support
- 09 Comfort and Health

### » International Sessions – abstracts in English only

- 10 Passive House in Central and Eastern Europe – networking for a sustainable future
- 11 Documentation of built Passive House examples in Central and Eastern Europe
- 12 Documentation of built Passive House examples in hot and cold climates
- 13 Economy, Ecology, Sustainability
- 14 Experience with renovation using Passive House technology

The detailed programme will be announced in March 2010. For further Information visit: [www.passivhaustagung.de](http://www.passivhaustagung.de)

Beat ever-increasing energy costs! Passive Houses allow for more comfort and lower energy demands: Intelligent solutions for old and new buildings will be on display in 2010 at the Passive House Exhibition in Dresden:

- Building companies, specialist associations, architecture and engineering offices, energy consultants and quality assurers
- Manufacturers of windows, doors, ventilation systems and insulating materials
- Providers of components, construction systems, technical services installations and solar companies

The exhibitors present building components and products which achieve the highest standard for energy-efficient buildings through top quality and innovative technology.

The Conference and the exhibition take place directly next to each other at the Congress Center Dresden.

A parallel programme of lectures at the exhibition area is directed to conference and exhibition visitors. Here, exhibitors can present their products and services.

We would be happy to welcome you at the 2010 Passive House Exhibition.

### » Passive House Exhibition 2010
